

TRANSPORTATION EQUITY: MEASURING SUCCESS

Solving Poverty and Pollution in CA

Key Topics

August 22, 2016

- Understanding equity in clean transportation
- Measuring progress
- Other takeaways

Joel Espino

Legal Counsel, Environmental Equity

Equity in Clean Transportation

- Community-driven
- Equity not Equality
- Access to clean transportation options
- Increase diversity in the clean transportation economy
- Ensure government is representative of underserved communities

Measuring Progress Toward Equity

- Increased access to clean transportation benefits in low-income communities and communities of color (e.g. greater mobility and cleaner air)
- Number of jobs created in these communities
- Diverse-owned business enterprise participation rate

Other Takeaways

- Quantitative and qualitative measurements
- Measurements can be simple
- Not everything can be measured but doesn't mean it's not important

Thank you
